BAJAJ Chlorinated Poly Vinyl Chloride (CPVC) Pipes and Fittings are manufactured from a specially formulated compound in accordance with Indian Standard **IS 15778 & ASTM D 2846 specifications**. These pipes and fittings are a perfect choice having many advantage over the conventional systems as they are corrosion free and resistant to most acids, bases, salts and halogens.

Product Range

Pipes -15 to 50mm (½” to 2”) sizes in SDR 11 and SDR 13.5 as per IS:15778. 65 to 110mm (2½” to 4”) sizes in SCH 40 and SCH 80 as per ASTM F-441.

Fittings-15 to 50mm (½” to 2”) size in SDR 11 as per ASTM D-2846 20 and 25mm 65 to 110mm (2½” to 4”) sizes in SCH 40 and SCH80 as per ASTM F-438 and F-439 respectively.

Fields of Application

BAJAJ C-PVC is designed for hot and cold water supply in residential, commercial and public projects, high and low rise buildings, corporate houses and academic institutes, solar heater applications etc. It is highly suitable for all uptake and down take lines, terrace looping including concealed pipe work applications.

BAJAJ Sewerage Waste Rainwater (SWR) Pipes & Fittings drainage system is designed for quick and efficient removal of waste without leakage. It is highly resilient, tough and durable with high tensile and impact strength. Moreover it is free from scale formation, rusting, weathering and chemical action. It is virtually immune to attack from bacteria, fungi, micro-organisms and insects. Thus, the system is a long term solution for building drainage with estimated life over 50 years. In addition to the various benefits, it is more cost effective than any conventional drainage system.

These pipes & fittings are tough and durable with high tensile and impact strength and are manufactured in accordance to IS:13592 - 1992 & fittings to IS:14735-1999.

Product Range

Pipes - 50 to 160mm sizes as per IS 13592

Fittings- 75 to 110mm sizes as per IS 14735

FEATURES AND BENEFITS

High quality and wide range - The system consists of pipes and a wide range of fittings with various traps, which makes the system complete in all respect and hence customer need not to depend on conventional systems.

Strong and long lasting - This system is highly resilient, tough and durable with high tensile strength and high impact strength. Moreover it is free from problems caused by scale formation, rusting, weathering and chemical action and hence it lasts for a lifetime.

UV resistance - It eliminates the adverse effect of sunlight and weather and can safely used for outdoor installations.

Quick and convenient installation - Being extremely light in weight and provided with special rubber jointing technique, installation of this system becomes very easy.

Quick and efficient removal of waste without leakage - Mirror smooth and restriction free inner surface of pipes and fittings ensures superior flow characteristics making the system free from problems of clogging and drain choke-up. System is completely leak-proof and designed to maintain high standards of hygiene.

Adequate and easy access for cleaning and clearing obstructions.

Low maintenance - Once installed Supreme S.W.R. drainage system need minimal maintenance.

Cost effective - Supreme S.W.R. drainage system is more cost effective than any other conventional drainage system.

 **BAJAJ Agriculture PVC Pipe & Fittings Offers** an Exhaustive range of uPVC Pressure pipes and fittings, pressure pipes are manufactured in different pressure classes. These pipes are superior to CI, DI or RCC pipes in terms of being light in weight, easy and quick installation, excellent corrosion and chemical resistance and quick installation, high flow rates, long life and economy.

Product Range

Pipes - 20 to 225mm as per IS:4985 in 2.5 to 10 kgf/cm² pressure classes

Fittings - 20 to 110mm as per IS:7834

Fields of Application

These pipes and fittings are used for a variety of applications like, irrigation, water supply, industrial process lines, swimming pools, firefighting mains, etc.

BAJAJ Plumbing System is an economical solution that is suitable for a wide variety of applications that involve transportation and distribution of potable water. This hygienic and cost effective system is not only technically superior to conventional GI piping systems but offers many additional advantages over them. It is easy to install and functionally the most suitable system for piping applications like terrace looping, down-take and up-take lines.

Product Range

Pipes - 15 to 1100 (½" to 4") sizes in SCH 40 and SCH 80 Pressure class as per ASTM D-1785

Fittings - 15 to 63mm (½" to 2") sizes in SCH 80 as per ASTM D-2467

FEATURES AND BENEFITS

Strong, resilient and long lasting - This system is highly resilient, tough and durable with high tensile and impact strength. It is also free from weaknesses caused due to rusting, weathering and chemical actions which helps it last considerably longer than GI pipe system.

Light weight - Being light in weight (1/6th the weight of metal piping), these pipes are easy to handle, transport and install.

Overall economy - Maintenance free, long life of a product which is light, can be cut, jointed and installed with little effort saves a huge amount of money over its life time.

Simple and leak proof joints - Jointing can be done speedily with the special solvent cement supplied by the company which ensures 100% leak proof joints.

Most suitable for carrying potable water - Being non-metallic and made from some special compounds, this system is free from corrosion, chemical reactivity and biological effects. Hence most suitable for potable water transportation.

Maintenance free - Being free from all the demerits of old systems like rusting, pitting, scaling, galvanic or electrolytic corrosion, the Supreme aqua Gold system can rightly boast of being maintenance free.

 **BAJAJ Garden Pipes** in the household users partner for life. It is a non-reinforced general purpose tube which comes as transparent. Coloured or plain opaque according to specification. It is available in various sizes (diameter 15 mm to 50 mm) as well as thickness (0.75 mm to 6 mm).

Product Range

1/2" (15mm) to 1 1/2" (50mm)

Fields of Application

- PVC Garden can be used in gardening, general water transportation & water connections etc.
- It can be used for domestic pesticide spraying & water spraying etc.
- It is used as levelling tubes in constructions.
- It ends applications in automobiles and laboratories.

Colours :

Green, Pink, Orange & Purple

SUCTION HOSE PIPING SYSTEM

For Motor Water Transmission

BAJAJ PVC SUCTION HOSE has a rigid PVC spiral reinforcement between soft walls which makes it an ideal replacement to rubber hoses. It is light in weight and extremely flexible. It can be put to task even at the most demanding curves & bends with absolutely no loss of flexibility. Smooth inside and outside it has an excellent resistance to pressure, external impacts, most of the chemicals, gases, light acids and saline water.

Product range

3/4" (20mm) to 4" (110mm)

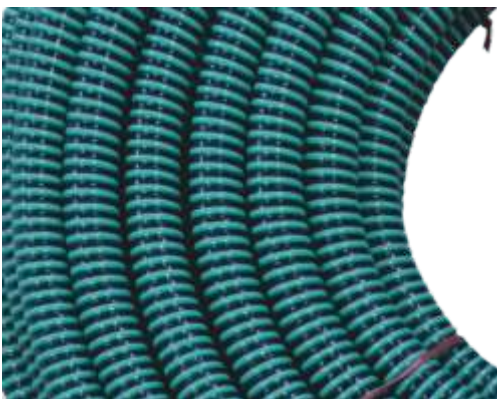

Fields of application

- PVC Suction Hose can be used in gardening, general water transportation & water connections etc.
- It can be used for domestic pesticide spraying & water spraying etc.
- It is used as levelling tubes in constructions.
- It ends applications in automobiles and laboratories.

BAJAJ PVC HIGH PRESSURE BRAIDED HOSE Qualified hi-strength lucent fibre-wire, PVC synthesis materials. Clearance and transparent pipe body is easy for controlling the carrying of liquid fux Strong power for felting internal and external layers, is high pressure resistance, non toxic and long life span.

Product range

1/2" (15mm) to 1 1/4" (40mm)

Fields of application

- PVC High Pressure Braided Hose can be used in gardening, general water transportation & water connections etc.
- It can be used for domestic pesticide spraying & water spraying etc.
- It is used as levelling tubes in constructions.
- It ends applications in automobiles and laboratories.
- Adopt qualified PVC synthesis materials and net shaped polyester fibre.
- Light weight, soft, elastic and easy for moving.
- Good durability
- The ideal necessity for various garden irrigation, vehicle washing and daily washing.

 **BAJAJ Medium Density Polyethylene pipe (MDPE)** is light weight, flexible and durable piping system which is manufactured within the world class Quality Management Systems as per ISO 9001-2008. Light weight, Flexible and durable. Crack resistant. Robust construction with high impact strength. Suitable for cold and waste water distribution system. Low friction losses due to excellent smooth internal surface. Resistant to chemical reaction, bacterial growth, corrosion, rusting etc.

Product range

20 mm to 32 mm

Fields of application

- MDPE can be used in gardening, general water transportation & water connections etc.
- It can be used for domestic pesticide spraying & water spraying etc.
- Light weight, soft, elastic and easy for moving.
- Good durability

HDPE PIPING SYSTEM

For Agriculture Water Transfer

BAJAJ HDPE Roll Coil Has Long Life, Non Corrosive, Low Friction, Weather Resistant, Cost Effective, Light Weight, Easy To Install Repair And Replace, Low Thermal And Electrical Conductive, Non Toxic, Hard And Unbreakable.

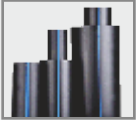

Product Range

1" (32mm) to 4" (110mm)

Field Of Applications

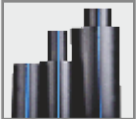

- Drinking Water Supply.
- Lifting Water For Agriculture.
- Obtain Water Through Pumps.
- Industrial Disposal Of Chemical Efficient
- Transportation Of Aggressive Fluids Chemical And Acid.
